The important message for this week is **not to rush simply because you are excited to begin**. Dawn's guidance is to start wisely. Think about what you want, organize the first steps, and then move forward with confidence.

A small and well-planned beginning can become the foundation for something much larger.

Career and Business

This week may encourage you to take the first step toward an important professional goal.

If you have been postponing a project, consider preparing it properly and beginning with one practical action. Your initiative can be useful, particularly when combined with careful planning.

Health and Well-being

A new week is a good opportunity to establish a simple healthy routine.

You may decide to improve your daily schedule, sleep routine, food habits, exercise, or time for relaxation.

Do not attempt too many changes at once. Begin with one practical habit and maintain it consistently.

Weekly Guidance: Start one positive routine and build it gradually.

Practical Earth Action for the Week

Create a **River Progress Plan**.

Write down:

My most important goal

Why this goal matters

Three responsibilities I must manage

One financial priority

One health habit

One relationship I want to strengthen

One action I will complete this week

Then complete that one action before the week ends.

Weekly Reflection

Ask yourself:

1. What direction do I want to follow?
2. What responsibility deserves my attention first?
3. Am I building consistent habits?
4. Are my financial priorities clear?
5. Am I giving enough time to family and relationships?
6. Is my daily routine supporting my well-being?
7. What small action will move me closer to my long-term goal?

River Weekly Message

“A river does not need to rush to reach its destination. It continues to flow, adjusts to the path and keeps moving forward. Build your strength through steady effort and let purpose guide your journey.”

Earth Guidance

THIS WEEK, BEGIN WITH DISCIPLINE, ORGANIZE YOUR RESPONSIBILITIES, SET CLEAR PRIORITIES, MAINTAIN FINANCIAL AWARENESS, PROTECT YOUR RELATIONSHIPS AND HEALTH, AND TAKE ONE STEADY STEP TOWARD A MEANINGFUL LONG-TERM GOAL.

FOREST ASTROLOGY 🌳

WEEK 1

December 28, 2026 – January 3, 2027

Earth Sign: Forest 🌳
Main Theme: Community, New Ideas and Building Connections
Guidance Theme: Grow together while remaining true to your own direction.

Overall Guidance

This week begins the Forest Astrology cycle with an emphasis on community, cooperation, innovation, and original thinking.

Forest energy reminds you that growth does not happen in isolation. Trees stand individually, yet they form a larger living system. Your ideas, abilities, and efforts can become stronger when they are connected with supportive people and meaningful communities.

At the same time, do not lose your individuality simply to fit into a group. Contribute your own ideas while respecting the strengths of others.

Mind and Thoughts

Allow your mind to explore new possibilities.

An unusual idea may deserve more attention than you initially expect. Give yourself permission to think differently while remaining practical.

Listening to different viewpoints can expand your understanding without requiring you to abandon your own judgment.

Work and Career

Cooperation can open useful professional possibilities this week.

Share ideas, communicate clearly, and recognize the strengths of people working around you. A team can often achieve something that would be difficult for one person to accomplish alone.

If you have an original idea, do not hide it simply because it is different. Present it thoughtfully and allow others to contribute.

Money and Finances

Financial decisions benefit from both independence and cooperation.

Discuss major financial matters with trusted people when appropriate, but make sure you understand the decision yourself before committing.

Avoid spending simply because a group or social circle encourages it. Your financial priorities should remain your own.

Relationships and Family

Connection is especially important this week.

Spend meaningful time with family, friends, colleagues, or supportive members of your community. Listen to others and allow relationships to develop naturally.

At the same time, maintain healthy individuality. Being connected does not mean giving up your personal boundaries.

Health and Well-Being

Social connection can support emotional well-being, but balance remains important.

Make time for people who encourage positive habits while also allowing yourself quiet periods for rest and reflection.

A healthy routine can include both community and personal space.

Personal Growth

Personal growth comes through learning how to grow with others.

Ask yourself what you can contribute to your family, workplace, or community. Your knowledge and creativity may become more valuable when shared.

At the same time, continue developing your own identity rather than measuring yourself entirely through other people's expectations.

Opportunities This Week

- Meeting supportive people
- Sharing an original idea
- Building stronger cooperation
- Joining a meaningful community
- Learning from different perspectives
- Creating something collaboratively
- Turning individual skills into shared progress

Things to Avoid

- Isolating yourself unnecessarily
- Suppressing your ideas to fit in
- Following group pressure without thinking
- Expecting others to understand your needs without communication
- Rejecting useful advice simply to remain independent
- Allowing social activity to consume all your personal time
- Comparing your growth with someone else's

Practical Earth Action for the Week

Choose **one person or group that contributes positively to your life**.

Reach out, share an idea, offer support, or begin a meaningful conversation. Let one connection become stronger through a simple action.

Weekly Reflection

How can I grow as an individual while also contributing to the growth of others?

Forest Weekly Message

“A strong forest is made of many individual trees. Grow in your own way, but remember the strength that comes from connection.”

Earth Guidance

Forest reminds you: Your individuality is valuable, and your connections can make that individuality stronger.

Grow together. 🌳

RENEWAL ASTROLOGY 🌎

WEEK 1

December 28, 2026 – January 3, 2027

Earth Sign: Renewal 🌎
Main Theme: Reflection, Fresh Beginnings and Hope
Guidance Theme: Renew your mind, refresh your direction and begin the new cycle with hope.

Overall Guidance

This week begins a new cycle for Renewal Astrology. Renewal energy is connected with reflection, compassion, imagination and the ability to begin again.

You may feel ready to leave behind old worries, unfinished thoughts or situations that no longer support your growth. You do not need to change everything immediately. A calm beginning can be more powerful than a rushed one.

Use this week to create emotional and mental space for what comes next.

Mind and Thoughts

Give yourself permission to think differently.

Past experiences can provide useful lessons, but they do not have to control your future. If an old concern returns to your thoughts, look at it with greater understanding rather than fear.

Hope grows when you allow yourself to imagine better possibilities.

Work and Career

A fresh professional direction may begin with a simple idea.

Review what you want from your work and identify one meaningful priority for the coming period. If an old approach is no longer effective, consider how it could be improved rather than immediately abandoning your goal.

Your imagination can help you discover practical new solutions.

Money and Finances

This is a good week to approach finances with calmness and clarity.

Review your important financial priorities and avoid decisions based purely on emotion. A fresh financial beginning can start with one simple improvement in saving, spending or planning.

Small changes can gradually create greater stability.

Relationships and Family

Renewal encourages compassion and understanding.

If an old misunderstanding remains between you and someone close, consider whether a gentle conversation could create a fresh beginning. Listening carefully may reveal feelings that were previously difficult to understand.

Give relationships room to heal and grow.

Health and Well-Being

Use this week to refresh your daily routine.

Rest, relaxation, movement and healthy habits can help create a stronger foundation. Avoid trying to make too many changes at once.

Choose one realistic habit that makes you feel more balanced and continue it consistently.

Personal Growth

Personal growth sometimes begins by accepting that you are allowed to start again.

Release unnecessary guilt about the past. Recognize what you have learned and use that knowledge to make wiser choices.

Your next chapter does not have to repeat the previous one.

Opportunities This Week

- Starting a new personal goal
- Releasing unnecessary worries
- Repairing an important relationship
- Developing creative ideas
- Improving daily routines
- Learning from past experiences
- Creating a clearer direction for the future

Things to Avoid

- Carrying unnecessary guilt
- Living too much in the past
- Making decisions from fear

- Expecting immediate transformation
- Ignoring your emotional needs
- Trying to change everything at once
- Losing hope because progress is gradual

Practical Earth Action for the Week

Take a quiet moment and write down **three things you want to leave behind** and **three things you want to welcome into your life**.

Keep the second list somewhere visible and take one small step toward it this week.

Weekly Reflection

What can I release from the past so that I can begin the next stage with greater hope?

Renewal Weekly Message

“Every new beginning carries the possibility of growth. Release what weighs you down and move forward with hope.”

Earth Guidance

Renewal reminds you: You can learn from the past without remaining trapped by it. Give yourself permission to begin again, with compassion, imagination and hope.

Renew with hope. 🌍
